

LSA surface water run-off permit application

July 2015

Frequently asked questions

What is happening with application EPR-HB3790ND?

This application was formally withdrawn by the Airport on 30 June 2015. As such, this application is no longer live and no further determination will take place under this reference number.

Why has this happened?

During the course of the determination of application EPR-HB3790ND, it became apparent that to ensure the environment was suitably protected it would be necessary for the applicant to treat the effluent in lagoons prior to discharge. As such, this meant significant changes would need to be made to the proposals originally put forward and so it was recommended that the applicant withdraw the existing application and submit a new one better reflecting the new plans.

What is happening now?

The applicant is preparing the new submission and collating all of the necessary supporting information. The required content was discussed prior to the withdrawal of the previous application to minimise any delays to commencing the determination.

When will the new application be submitted?

It is anticipated that the new application will be submitted in mid-to-late July.

Will I be notified when the new application is submitted?

When the new application is submitted and deemed duly made, a communication will be sent informing everyone who had shown interest in the previous application.

Will I have the opportunity to comment on the new application?

Another communication will be sent to inform people of the publicising dates for the new application. This is the period during which the application details are published on the GOV.UK website and relevant comments can be made/questions asked for a period of 20 working days.
